Abstract:

Are these three aspects - land question, land issues and land administration one and the same? If there is a difference then what is it about and how are they interconnected? What was the historical trajectory of the land administration? What kind of changes have taken place in land administration? Do these changes protect the poor farmers and rights of the cultivators? What kind of challenges poor landholders and cultivators have been encountering due to changes in land administration? How have the changes in land administration influence the land relations? How did agricultural practices in turn influence the land relations. The speaker will reflect and share his thoughts on these questions.
